

The NanoMaxx™ ultrasound tool offers a range of transducers with broadband signal processing capabilities, to produce high resolution diagnostic imaging across a range of clinical applications to support clinical diagnosis and guide interventional procedures. With a fluid-resistant membrane for easy cleaning and the ability to withstand the impact of a 3 foot drop, you can depend on the NanoMaxx system to perform in the most demanding of situations and environments. The NanoMaxx system and its transducers are covered by SonoSite's industry-leading 5-year technology driven warranty.

Transducer	Applications	Bandwidth	Scan Depths	Biopsy Kit
<b>L38n</b> 	Venous, vascular, small parts, musculoskeletal, nerve, IMT	10-5 MHz 38-mm broadband linear array	9 cm	–
<b>L25n</b> 	Venous, vascular, musculoskeletal, superficial, nerve, IMT	13-6 MHz 25-mm broadband linear array	6 cm	Transverse Guide Available
<b>C11n</b> 	Abdomen, vascular	8-5 MHz 11-mm broadband curved array	10 cm	–
<b>C60n</b> 	Abdomen, gyn, OB, nerve	5-2 MHz 60-mm broadband curved array	30 cm	–
<b>P21n</b> 	Abdomen, OB, cardiac	5-1 MHz 21-mm broadband phased array	35 cm	–
